

SAFE ENSUITES FOR YATALA PRISON

Project Name:	Yatala prison
Project Sector:	High Security
Project Location:	Northfield Australia
Project Completed:	2022-06-19
Project Value:	\$149 Million

The redevelopment of Yatala Prison in South Australia marks a significant advancement in the state's correctional infrastructure. This \$149 million project is designed to enhance security, improve facility durability, and support the overall goal of reducing reoffending rates among inmates. KWC DVS played a vital role in this redevelopment by supplying a range of high-security washroom products tailored to the demanding conditions of correctional facilities.

As part of the redevelopment, the project aimed to modernise the facility, ensuring that all installations met the highest standards of security, hygiene, and durability. The integration of KWC DVS's specialist high-security products was instrumental in achieving these goals.

Key Features of KWC DVS High-Security Products

KWC DVS specializes in high-security washroom solutions that are built to withstand the unique challenges of correctional facilities. The key features of the supplied products include:

Robust Construction: Manufactured using specialist mould tools and thick Gelcoat layers, ensuring a hygienic, durable, and easy-to-clean surface.

Ligature Resistance: Designed to reduce the risk of self-harm and enhance inmate safety.

Fire Retardant Properties: Made from materials that are resistant to fire, ensuring compliance with safety standards.

Vandal-Resistant Design: Engineered to withstand extreme conditions and impact, making them ideal for correctional environments.

The partnership between KWC DVS and the Yatala Prison redevelopment project highlights the importance of specialized, high-security washroom solutions in correctional facilities. With a strong focus on safety, durability, and hygiene, KWC DVS continues to provide essential infrastructure solutions tailored to the most demanding environments.

KW-VR01-010 High-Security Ligature Resistant Toilets

KW-VR01-072 V2 High-Security WC Pan Less Able with Grey Top

KW-VR01-080 High-Security High Sided Integrated Basins (not including sensors)

KW-VR01-031 High-Security Single Spout Integrated Basins (not including sensors)

If you are working on a similar project and require expert advice on specifying high-security washroom products, MacDonald Industries experienced team is ready to assist. Get in touch with us to learn more about our products and how they can support your project needs.
