

DUAL FLUSH PUSH PANELS AND PUSH BUTTONS. FOR USE WITH: DUAL FLUSH ZURN VALVES

DESCRIPTION:

The range of dual flush push panels and push buttons shown below are for use with any Zurn Dual Flush flush valve. When specifying, ensure both the valve and push panel/button have been specified separately.

PUSH PANEL:

ZDF-P Dual flush panel assembly with 150 x 210mm satin finish stainless steel panel and push plate. Suitable only where there is duct access behind.

ZDF-PA-SP As above but with a 345 x 450mm access panel and frame.

ZDF-PC-SP As above but with a 330 x 450mm access panel and frame with concealed fixing.

ZDF-PA As above but with a 345 x 345mm access panel and frame. Note: care needs to be taken to ensure push panel valving doesn't impinge with flush valve in wall

ZDF-PC As above but with a 330 x 330 mm access panel and frame with concealed fixing. Note: care needs to be taken to ensure push panel valving doesn't impinge with flush valve in wall

OPTIONS:

All push panels, above, are supplied in a satin stainless steel finish. Optional push plates are available by inserting the following suffix after the above product code.

...SWB-WH White raised plastic push button comes with braille (for accessible use).

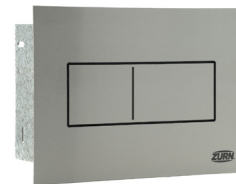

...SWB-BL Blue raised plastic push button comes with braille (for accessible use).

Etching Options:

All push panels come standard with the Zurn logo on the bottom right hand corner.

...NON No etching on panel

...MDI MacDonald Industries Logo on panel
